ABOUT THE CRSP U.S. SMALL CAP INDEX

The CRSP US Small Cap Index includes U.S. companies that fall between the bottom 2%-15% of the investable market capitalization. There is no lower limit in market capitalization, other than what is specified by investability screens. The index includes securities traded on NYSE, NYSE Market, NASDAQ or ARCA. Ranking days, the days on which eligibility rules are applied and on which pro forma indexes are created, occur after the market close on the first Fridays of March, June, September and December. Reconstitution occurs quarterly after the market close on the third Fridays of March, June, September and December.

Founded in 1960 to develop the first definitive measurement of long-run market returns, The Center for Research in Security Prices (CRSP) has long been an integral part of the academic and commercial world of financial and economic research. Since its inception, CRSP has partnered with the investment industry to develop and maintain databases and market indexes that are widely used by academics and commercial practitioners.

Further, CRSP and its data providers expressly disclaim, and you hereby waive, any and all implied warranties, including, without limitation, warranties of accuracy, completeness, non-infringement, merchantability, and fitness for a particular purpose. Neither CRSP nor any of its data providers will be liable or have any responsibility of any kind for any loss or damage that you incur resulting from the act or omission of any other party involved in compiling, computing, or creating the report or the data contained therein, whether or not the circumstances giving rise to such cause may have been within the control of CRSP or of any vendor. The historical performance statistics of CRSP's market cap indexes are based upon eleven years of backtest data from January 1, 2001 through March 31, 2011. Subsequent backtest was run with June 29, 2001 as the start date in order to align with the value and growth style indexes. As is common industry practice, CRSP backtest data does not include float shares. Descriptive statistics are based upon current index constituents. Backtest results are not indicative of future performance.
