

# CRSP US STOCK & INDEX DATABASES RELEASE NOTES

FEBRUARY 2026 MONTHLY UPDATE

## IMPORTANT REMINDER

As communicated previously, subscribers are required to migrate to CIZ, as the December 2024 data was the last release produced in the Legacy (FIZ) and Flat File Format 1.0 (SIZ) formats. The January 2026 data is being released in CIZ format only. Please visit our website for [related documentation](#).

For more information on CRSP's new Flat File Format 2.0 (CIZ), watch the [WRDS Research Webinar](#) which addresses common questions. To access the webinar, please use the following password: 2tK94Er!

## CUMULATIVE ADJUSTMENT FACTOR (CAF) FILE EDITS

1. In the SAS files for StkDlyCumulativeAdjFactor and StkMthCumulativeAdjFactor the format of DlyCumFacPr /MthCumFacPr and DlyCumFacShr/MthCumFacShr fields will have format comma24.12 rather than comma20.1. This will also be seen in the entries for StkDlyCumulativeAdjFactor and StkMthCumulativeAdjFactor tables in the MetaColumnInfo table.
2. The monthly StkMthCumulativeAdjFactor files only included records for completed months for delisting securities. The files should include records for incomplete months at the end of the history. The dropped records for incomplete months are being added in this updated release.
3. Last month, the file names for StkDlyCumulativeAdjFactor and StkMthCumulativeAdjFactor showed up as camelCase in the SAS versions for CAZ and C6Z. They should have been lower case (stkdlcumulativeadjfactor and stkmthcumulativeadjfactor) to be consistent with the over variants (CIZ and CXZ). They are lowercase with this month's fix.

## FILE VERSION SPECIFICS

This table contains version specific information for the CRSP Stock Files with data ending January 2026. It contains the number of securities and information about the maximums of the event arrays.

## DELIVERY METHOD, INSTALLS, AND DATA FORMATS

### DELIVERY

CRSP data delivery for all products is available through IPSwitch's MOVEit Cloud ([crsp.moveitcloud.com](https://crsp.moveitcloud.com)).

### ZIP INSTALLS

CRSP uses a zip process for data installation. ZIP utilities that are standard on all platforms should work to unzip the databases. On Windows computers, CRSP recommends using 7-ZIP ([7-zip.org](https://7-zip.org)).

Several important items to note follow:

- All directories are extracted to lower case letters. For example: C:\crspdata\miz202508
- All Windows Users: Extracting a zipped file does not create an installed program in Windows. It will not show in the Windows Control Panel. When uninstalling the data, just delete the directories that contain the detailed files
- Red Hat Linux Users: If your version of Red Hat is earlier than 6.0, you will need to install an updated version of the “File Roller” program in order to install the data

## ZIP FILE STRUCTURE AND PROCESS

### WINDOWS 7/XP PRODUCTS:

Product Label	Product Name	File Name
A6Z1_yyyyymm_SLD	CRSP 1962 US Stock	a6zyyyyymm_cadb.zip
AXZ1_yyyyymm_SLD	CRSP 1962 US Stock and Index	axzyyyyymm_cadb.zip
FAZ1_yyyyymm_SLD	CRSP 1925 US Stock	fazyyyyymm_cadb.zip
FIZ1_yyyyymm_SLD	CRSP 1925 US Stock and Index	fizzyyyyymm_cadb.zip

### RED HAT LINUX PRODUCTS:

Product Label	Product Name	File Name
A6Z1_yyyyymm_SLD	CRSP 1962 US Stock	a6zyyyyymm_cadb.zip
AXZ1_yyyyymm_SLD	CRSP 1962 US Stock and Index	axzyyyyymm_cadb.zip
FAZ1_yyyyymm_SLD	CRSP 1925 US Stock	fazyyyyymm_cadb.zip
FIZ1_yyyyymm_SLD	CRSP 1925 US Stock and Index	fizzyyyyymm_cadb.zip

### FLAT FILE PRODUCTS:

Product Name	File Name
SAS Zip	s*zyyyyymm_sas.zip
ASCII Zip	s*zyyyyymm_ascii.zip
R ZIP	S*ZYYYYMM_R.ZIP

## STEPS TO INSTALL:

- From the directory containing your downloaded zip file, right click (in Windows) or run File Roller (in Red Hat)
- Set the extract destination to the current higher level directory where data is normally stored and unzip will add the rest of the path (default is C:\ in Windows or /home in Red Hat)
- For example, in Windows, extracting to C:\ will install the data under C:\crspdata

## SETTING ENVIRONMENT VARIABLES

The zip process will not automatically set environment variables for use with command line tools. The following steps will do so.

**NOTE:** CRSPSift does not use and therefore does not require environment variables.

### LINUX

**NOTE:** The new zip installs are now saving to directories with lower case letters – for example, ~/crspdata/diz202508

Check the current state of the environment variables by entering this command: `env | grep crsp`

- If you have admin privileges on your machine, open the .profile file, and make updates to the following lines to update the paths for the new data installed:
  - `CRSP_DSTK=<full path name>/<daily stock directory>` (example: `CRSP_DSTK=~ /crspdata/diz202508`)
  - `CRSP_MSTK==<full path name>/<monthly stock directory>` (example: `CRSP_DSTK=~ /crspdata/miz202508`)
  - `CRSP_IND=<full path name>/<index directory>` (example: `CRSP_IND=~ /crspdata/ifz202508`)
- If you are using the bash shell (or any Bourne-style shell), enter the same commands above and export each one. This will

make changes for your current session only and does not save to the .profile file.

- A shell script is available to make changes that can be reused for each update done. Note that this will only make changes to your current session and does not save to the .profile file.
  - Navigate to where the CUPL tools are loaded and then enter: `cd accbin`
  - Start the script by entering: `./crsp_setup.sh`
  - The script will prompt for the following:
    - File name (*will be appended with .kshrc*)
    - Top level directory (this should be where CUPL tools are located (*example: ~/crsp*))
    - Scratch directory for error messages – name can be anything
    - Enter path for daily stock directory (*example: ~/crspdata/diz202508*)
    - Enter path for monthly stock directory (*example: ~/crspdata/miz202508*)
    - Enter path for CCM directory – enter to leave blank
    - Enter path for CST directory – enter to leave blank
    - Execute script by running: `. ./<file name created above>.kshrc` (*note there is a space between the two dots*)

## WINDOWS:

The CRSP Client Environment utility provides users a way to check the location of the software and to set environment variables. The utility can be started by locating it under installed programs CRSPAccess/CRSP Client Environment, or by navigating to the /accbin folder where the CUPL tools are installed and running: Client\_Environment.exe. After making any changes, be sure to log off and back into Windows for the settings to be saved.

**NOTE:** For subscribers of the CRSP Compustat Merged database, additional CCM database environments will be displayed for the location of the Compustat data.
